Use the substitution method to solve for the solution set. 1) 2) Solve equation 2 for y: Substitute into equation 1: If equation 1 was solved for a variable and then substituted into the second equation a similar result would be found. This is because these two equations have No solution. Change both equations into slope-intercept form and ...

Algebra 1 : How to find out when an equation has no solution

François Viète's work on new algebra at the close of the 16th century was an important step towards modern algebra. In 1637, René Descartes published La Géométrie, inventing analytic geometry and introducing modern algebraic notation. Another key event in the further development of algebra was the general algebraic solution of the cubic and quartic equations, developed in the mid-16th ...

I was doing my homework today, and I am not sure if my solution is correct. The problem is stated as follows: "Determine the values of a for which the system has no solutions, exactly one solution, or infinitely many solutions." The following is my solution for this problem. The text in green is the answer in the back of my textbook.

So $x = 6$ is a solution. How about other values for x ? For $x=5$ we get " $5-2=4$ " which is not true, so $x=5$ is not a solution. For $x=9$ we get " $9-2=4$ " which is not true, so $x=9$ is not a solution. etc; In this case $x = 6$ is the only solution.

SOLUTION Factoring numerator and denominator, we have To factor polynomials of degree 3 or more, we sometimes use the following fact. The Factor Theorem If $f(x)$ is a polynomial and $(x - a)$ is a factor of $f(x)$, then $f(a) = 0$. EXAMPLE 8 Factor $f(x) = x^3 - 2x^2 - 15x + 18$. SOLUTION Let $f(x) = x^3 - 2x^2 - 15x + 18$. If $(x - a)$ is a factor of $f(x)$, then $f(a) = 0$. We find that $f(2) = 0$, $f(-3) = 0$, and $f(3) = 0$. Thus, the possibilities for a are $2, -3, 3$.

No x can magically make 3 equal 5, so there's no way that you could make this thing be actually true, no matter which x you pick. So if you get something very strange like this, this means there's no solution. On the other hand, if you get something like 5 equals 5-- and I'm just over using the number 5. It didn't have to be the number 5.
