Computer Networking: The Complete Guide to Understanding ...

A computer network is a group of computers, two or more, connected to each other through a wire or a cable or even wireless. You can share files with other computers this way easily. If the network is large enough and lets you access a large number of computers, it becomes even more useful.

Networking Tutorials for Beginners : Get Your Basics Right ...

Early computer networks used cable to connect computers together in a wired network. Most modern networks use wireless (wi-fi) as the main connection media and networks tend to be a mixture of wired and wireless. The diagram below shows a wired Ethernet network. To work each device must be connected to a Ethernet hub or switch.

Basic Home Networking Course for Beginners

Wired networks use Ethernet over UTP cable and tend to be faster than wireless networks, which is an important consideration if you are a gamer. The simple wired home network diagram below shows a minimum setup with a switch and broadband router.
