Key Takeaways Key Points. A conic section (or simply conic) is a curve obtained as the intersection of the surface of a cone with a plane; the three types are parabolas, ellipses, and hyperbolas. A conic section can be graphed on a coordinate plane. Every conic section has certain features, including at least one focus and directrix.

Conic sections are one of the important topics in Geometry. A curve, generated by intersecting a right circular cone with a plane is termed as 'conic'. It has distinguished properties in Euclidean geometry.. The vertex of the cone divides it into two nappes referred to as the upper nappe and the lower nappe.
