Custom Guides

Blockly comes with a large number of pre-defined blocks. Everything from mathematical functions to looping structures. However, in order to interface with an external application, one must create custom blocks to form an API. For example, when creating a drawing program, one might need to create a "draw circle of radius R" block.

Editable custom editors let you hook in to standard VS Code operations such as undo and redo, save, and hot exit. This makes editable custom editors very powerful, but also means that properly implementing is much more complex than implementing an editable custom text editor or a readonly custom editor.

Custom Editor API | Visual Studio Code Extension API

In the list of custom alerts, click the alert name. Make any changes you want to the configuration of the alert, then click Save Alert. Delete custom alerts To delete a custom alert, navigate to your view, then: Open Reports. Click CUSTOMIZATION > Custom Alerts. Click Manage custom alerts. In the list of custom alerts, click Remove for an alert.
