Definition. Collinearity is a linear association between two explanatory variables. Two variables are perfectly collinear if there is an exact linear relationship between them. For example, x_1 and x_2 are perfectly collinear if there exist parameters α and β such that, for all observations i , we have $x_2 = \alpha + \beta x_1$. Multicollinearity refers to a situation in which more than two explanatory variables in a multiple ...

Dependent and Independent variables are variables in mathematical modeling, statistical modeling and experimental sciences. Dependent variables receive this name because, in an experiment, their values are studied under the supposition or demand that they depend, by some law or rule (e.g., by a mathematical function), on the values of other variables.. Independent variables, in turn, are not ...
