### Copart BMW E60 Build I What Does This N52 Engine Need ...

The BMW N52 is a straight-6 DOHC piston engine which was produced from 2004-2015. Compared with its M54 predecessor, the N52 features variable valve lift (called Valvetronic by BMW), a lighter block due to the use of a magnesium alloy and an electric water pump and a variable oil pump.

### Bmw Engines - BMW N52 Engine (2004-2015)

The intake manifold on BMW E90 and E60 cars with normally aspirated NG6 (new generation) N51 engines are equipped with a standard non-variable intake manifold. These engines have the same displacement as the N52 engines, but are designed with stricter emission standards in mind.

### BMW E60 5-Series N52 Engine Intake Manifold Upgrade ...

History, Power & Specs of the N52 Engine. There were 2 versions, the N52B25, and N52B30. The differences between these engines are the N52B25 has a smaller bore and stroke, so pistons, crank etc are different, but they share the same block and head. The N52 was a straight 6 NASP engine and won a Wards best engine award in 2007 and 2006. It also ...

### Guide to tuning the N52 (N52B25,N52B30) engine from BMW

The E60 was the first 5 Series to be available with a turbocharged petrol engine, a 6-speed automatic transmission and regenerative braking. The M5 model was introduced in 2005 and is powered by the BMW S85 V10 engine. It was sold in the sedan and wagon body styles, with most cars using the 7-speed SMG III transmission.

Our favorite engine management option is the BMS Power Box tuner for BMW N52 128i, 328i & 528i models. Good for 8-10whp / 8-10wtq on its own, the Power Box is a plug-n-play tuner that does not rewrite your ECM, thereby leaving no trace on the ECU if you remove it later on - this device remaps the throttle and other ECM settings to get the car to peak performance.

### Get 70hp with 5 Best Power Mods for BMW 328i 128i + 528i

The N53 replaced the N52 in most markets, except for notably the North American Market and Australia. These markets were excluded due to high sulfur content in the fuel, BMW was able to reduce fuel consumption in the N53 engine by adding direct injection and a nitrogen oxide storage catalytic converter.
