The latest guidelines, which were published in November, contain a number of changes in relation to general good practice guidance, updated terminology and definitions for flat roofs.

New code sets new standards for flat roofing - Building ...
For definition purposes BS 6229 defines a flat roof as “having a pitch less than 10° to the horizontal”. New flat exposed waterproofing roofs should be designed to have adequate finished falls and to drain efficiently. Typically the creation of a pitch or slope can be achieved either in the deck or by using tapered insulation.
