This engine is easily determined from the Ford 'Crossflow' by the type of head since the carburettor and the exhaust are both on the right hand side of the engine. The Pre-X/Flow, first fitted to the 107E Prefect and 105E Anglia in 1959, replaced the previous side-valve units and was initially available in sizes, 997, 1198, 1340 and eventually 1498cc.

The Ford Kent is an internal combustion engine from Ford of Europe. Originally developed in 1959 for the Ford Anglia, it is an in-line four-cylinder overhead-valve-type pushrod engine with a cast-iron cylinder head and block.. The Kent family can be divided into three basic sub-families; the original pre-Crossflow Kent, the Crossflow (the most prolific of all versions of the Kent), and the ...

Ford Kent engine - Wikipedia

These engines were offered in the Ford Falcon XC in Australia. Whereas the previous integral "log head" I-6 motor borrowed from the Ford FE engine family design, the new crossflow motor borrowed from the Ford 351 Cleveland engine family. A common upgrade for a crossflow head engine is to use 351 Cleveland roller tip rocker arms.
