Nanotechnology is a known field of research since last century. Since “nanotechnology” was presented by Nobel laureate Richard P. Feynman during his well famous 1959 lecture “There’s Plenty of Room at the Bottom” (Feynman, 1960), there have been made various revolutionary developments in the field of nanotechnology. Nanotechnology produced materials of various types at nanoscale level.

Accelerators for Neural Networks and High-Speed Image Processing for Edge Devices: Devices at the edge of the cloud increasingly need intelligence to detect important events and perform on-sensor inference instead of transmitting raw data to the data centers. To address this growing need, our lab has been working on hardware acceleration for image processing [20, 39] and deep learning/neural ...
