The part n is SBA0800D for black and SBA0805D for chrome. You do not need to stack the channel type helicals in the R62_72. There is a kit manufactured that uses the old style square helical but is bigger for aggression and also has the pitch increased over the concave to reduce the amount of material passing over the concave twice.

Gleaner also explored use of turbocharged diesel engines before the competition. Records from October 1962 list the 262-cubic-inch turbo-diesel engine as being available for the model "C". Another Gleaner innovation was a "rock door" to protect the machine from damage due to stones that it might pick up while harvesting.
