JavaScript (/ˈdʒɑːvɑːskriːpt/) , often abbreviated JS, is a programming language that is one of the core technologies of the World Wide Web, alongside HTML and CSS. Over 97% of websites use JavaScript on the client side for web page behavior, often incorporating third-party libraries. All major web browsers have a dedicated JavaScript engine to execute the code on users’ devices.

Working with Rules. Note: This page covers the most recent rule format for ESLint >= 3.0.0. There is also a deprecated rule format.. Each rule in ESLint has three files named with its identifier (for example, no-extra-semi). in the lib/rules directory: a source file (for example, no-extra-semi.js); in the tests/lib/rules directory: a test file (for example, no-extra-semi.js)

Working with Rules - ESLint - Pluggable JavaScript linter

The windows settings program when having maximum performance on it uses 50% gpu power and causes the gpu to reach 40c on idle instead of the normal 28c. Having adaptive performance enabled has stopped certain background programs to hog gpu power. it now sits at 10% gpu usage at all times on idle now.
