Histopathology of Preclinical Toxicity Studies (3rd ed.)

The Types of Studies in Preclinical Trials
Posted by krishna kumar Preclinical trials, also known as non-clinical trials are the laboratory tests of a new drug, device or medical treatment on animal subjects. The main aim of preclinical studies is to see whether the drug or the treatment really works and whether it is safe to test on humans.

The Types of Studies in Preclinical Trials

more effective in treating acute inflammatory diseases in human and this is our preclinical safety study of human DSCs in Sprague-Dawley rats and Balb/c mice. Human DSCs were cultured
