Lecture Notes General Surgery 12th

tant facts in general surgery that are classified, analysed and as far as possible rationalized for the revision student. These lecture notes represent our own final - year teaching; they are in no way a substitute for the standard textbooks but are our attempts to draw together in some sort of logical way the fundamentals of general surgery.

Origin and distribution of somatic and autonomic nerves. 1,2 Somatic (voluntary) neurons exit all levels of the brain and spinal cord (CNS). They release acetylcholine (ACh) to activate nicotinic receptors (N m) on skeletal muscle. Preganglionic parasympathetic neurons exit the brain and sacral spinal cord, where they synapse with ganglia near or within smooth muscle and heart.

1. Introduction. Soon after the beginning of the First World War 'cases of nervous and mental shock' began to arrive in England. 1 At first, the medical profession did not pay much attention to these psychological casualties which were seen as 'the more uncommon clinical products of the present war'. 2 For most of 1914, the British medical press mainly reported single cases, such as ...

Melanoma, also redundantly known as malignant melanoma, is a type of skin cancer that develops from the pigment-producing cells known as melanocytes. Melanomas typically occur in the skin, but may rarely occur in the mouth, intestines, or eye (uveal melanoma). In women, they most commonly occur on the legs, while in men, they most commonly occur on the back.
