### **N52 Engine**

The BMW N52 is a naturally aspirated straight-six petrol engine which was produced from 2004-2015. The N52 replaced the BMW M54 and debuted on the E90 3 Series and E63 6 Series.. The N52 was the first water-cooled engine to use magnesium/aluminium composite construction in the engine block. It was also listed as one of Ward's 10 Best Engines in 2006 and 2007.

### **BMW N52 - Wikipedia**

The N52 engine uses BMW's VANOS system, which is a variable valve timing system. The VANOS solenoids are responsible for controlling how much oil flows to the cam gears, which in turn

Like every other BMW engine made after 1990, the N52 came with VANOS. Essentially, this was BMW's V-TEC equivalent, which modulated the engine's valves for better fuel efficiency or more power. Unfortunately, the solenoids which do the modulation can fail after about 70,000 miles, BMW Tuning reports.

The N52 Engine Tick. The N52 engine was used in many of the BMW models from the years 2004-2015, making its original presentation in E90 330i and E63 630i models. The N52 engine was world-renowned for its more advanced technology and engineering over previous BMW models. Despite its highly reviewed performance capabilities, the N52 engine began displaying some noticeable symptoms of malfunction.

### **N52 Lifter Tick Causes and Solutions**

Unlike early N52 engines, which used a magnesium valve cover and had an external crankcase vent valve, the updated version features a plastic valve cover with an integrated PCV valve. One thing to note about the N51 and N52N engines is that the valve cover screws DO NOT need to be replaced, unlike the
