Data Mining Algorithms In

Download Free Package Nnet R

R/Packages/nnet. This chapter introduces the Feed-Forward Neural Network package for prediction and classification data. An artificial neural network (ANN), usually called "neural network" (NN), is a mathematical model or computational model that is inspired by the structure and/or functional aspects of biological neural networks.

nnet package is one such package.

Neural Networks Using the R nnet Package -- Visual Studio ...

R has a few packages for creating neural network models (neuralnet, nnet, RSNNS). I have worked extensively with the nnet package created by Brian Ripley. The functions in this package

Download Free Package Nnet R

allow you to develop and validate the most common type of neural network model, i.e, the feed-forward multi-layer perceptron.
