The paper grain is the direction in which most of the paper fibers run. The grain typically runs with the length of a rectangular sheet. Test the paper to find the grain by bending the paper part way, as if to fold it. Do this in each direction. There is less resistance when the fold line runs with the grain. With the grain vs. against the grain

(TO MAKE A SQUARE: You can make a square from a rectangular piece of paper simply by folding one corner down to form an isosceles triangle and trimming off the excess paper. See second picture.) I usually make two snowflakes for every 8.5"x11" piece of paper, so I first cut the paper in half, and then make a square from each half.
