$10-16+14-6=2$ steps. At 6:00 a.m., the temperature was 16 degrees Fahrenheit. The temperature was 10 degrees Fahrenheit higher at 10:00 a.m. Create an equation. $16+10=26$ degrees Fahrenheit at 10:00 a.m. Sha'nya deposited \$15 in her checkings account. She went to the mall and made a purchase of \$30.

Unit 1: Operations of Rational Numbers - STUDY GUIDE ...

Adding and Subtracting Rational Numbers. 1) Use your integer rules to determine if your answer is positive or negative (found in Study Guide 1) 2) Follow rules for adding and subtracting fractions (found in Study Guide 2) Multiplying Rational Numbers.

Name Chapter 2 Remediation Packet - Study Guide - Rational ...

All numbers included in the rational number set can be written as a ratio of integers: If a and b are integers: Rational numbers can be written as $\frac{a}{b}$, as long as $b \neq 0$. Clearly, the set of integers can be written as ratios because any integer divided by "1" results in the original integer.

What is a Rational Number? | Math Review [Video]

Answer: 3 , $\frac{1}{4}$, 0.25673 , 3 , 1 : 5 . 3 is a rational number because it is an integer. $\frac{1}{4}$ is a rational number because it is a fraction. 0.25673 is a rational number because it is a repeating decimal. π is not a rational number because it is a non-terminating decimal. 1 : 5 is a rational number because it is a ratio.

Rational Numbers That Are Not Integers - Free Practice ...

The proper form for any rational number is in fraction form. Unlike regular fractions where you want your bottom number to be larger than the top number, it is perfectly okay for the top number in...
