Tenth grade or grade 10 (called Year 11 in England and Wales, and sophomore year in the US) is the tenth year of school post-kindergarten or the tenth year after the first introductory year upon entering compulsory schooling. In many parts of the world, the students are 15 or 16 years of age, depending on when their birthday occurs. The variants of 10th grade in various countries are described ...

Tenth grade - Wikipedia

Introduction. The National Science Board (2003) sounded an alarm about critical workforce shortages in jobs that require high-level mathematical and science skills. Their fears about a dwindling pool of mathematicians and scientists has fueled concern that the United States will not be able to maintain its leadership in science and technology, which translates directly to an inability to fill ...

IPCC — Intergovernmental Panel on Climate Change

Today, manipulative materials are well-established in the classroom, especially in the early grades. Education journals are filled with papers on ways of using manipulative materials in the classroom -- papers with colorful titles such as "Lima Beans, Paper Cups, and Algebra" [8] and "Activities to Grow On: Buttons, Beads, and Beans" [5].

From an early age we learn to live in a world with numbers: on classroom doors, street signs, price tags, our phones, on our work activities. Typically we learn how numbers and quantities relate to each other (e.g., smaller, larger) from an early age; and most of us received some formal training in math, starting from grade school.
