The SolarWinds Security Event Manager is mainly a HIDS package, but you can use NIDS functions with this tool as well. The tool can be used as an analytical utility to process data collected by Snort. You can read more about Snort below. Snort can capture traffic data that you can view through the Security Event Manager.

10 Best Network Intrusion Detection Systems 2022 & NIDS Tools

Next Steps. Remember to be very careful if you are going to execute this stored procedure in a production environment. That's why the default behavior of the stored procedure is to display only the status of the databases and the script with the T-SQL code without moving forward with the failover itself (you definitely don't want to trigger an unwanted failover by mistake).
