In physics, the special theory of relativity, or special relativity for short, is a scientific theory regarding the relationship between space and time. In Albert Einstein's original treatment, the theory is based on two postulates: . The laws of physics are invariant (that is, identical) in all inertial frames of reference (that is, frames of reference with no acceleration).

## **How does relativity theory resolve the Twin Paradox ...**

In Special Relativity, the transformation group is what one could call the "velocity transformations", or Lorentz transformations. It is the set of linear transformations,  $(x', t') = \Lambda(x, t)$  (1.2) subject to the extra condition that the quantity  $\gamma$  defined by
