In mathematics, set A is a subset of a set B if all elements of A are also elements of B; B is then a superset of A.It is possible for A and B to be equal; if they are unequal, then A is a proper subset of B.The relationship of one set being a subset of another is called inclusion (or sometimes containment).A is a subset of B may also be expressed as B includes (or contains) A or A is included ...

Camino euleriano

En la teoría de grafos, un camino euleriano es un camino que pasa por cada arista una y solo una vez. Un ciclo o circuito euleriano es un camino cerrado que recorre cada arista exactamente una vez. El problema de encontrar dichos caminos fue discutido por primera vez por Leonhard Euler, en el famoso problema de los puentes de Königsberg
