1. Introduction. Although hospital falls  
have been decreasing over the past  
several years, they remain a significant  
problem. 1 Patient falls are the most  
common adverse events reported in  
hospitals. 2-5 Each year, roughly  
700,000 to 1 million patient falls occur in  
U.S. hospitals resulting in around  
250,000 injuries and up to 11,000  
deaths. 6 About 2% of hospitalized  
patients fall at least ...

Falls can also be related to medications and many other issues. Sometimes individuals are “stubborn” as a way of masking fear when it comes to health problems. Not being able to walk without help will soon lead to more health challenges in an older adult and should be addressed before it progresses or causes other complications.
